

# *Impact Team*

---

A team of 3 joining together to make an impact

# PROBLEM

---

Decaying of harvested seeds and crops, due  
to excess moisture and humidity

# SOLUTION

---

Making a component that, measures the moisture of the harvested crops, and notifies when it exceeds a certain level

# Target Customers

---

Large farmers, and wholesale buyers

# USP

---

Currently not many competitors in the field.

# Competitors

---

For now, none

# TOOLS / SKILL SETS

---

- Arduino
- C++
- Moisture & Humidity sensor

# MILESTONES

---

Literature review done, with research papers.

Identified components needed for prototype.

In the upcoming months hoping to complete the first  
prototype.

# THE TEAM

---

Mentor: DR. K Lalitha

Founder: S.Ajay

Co-founder: Rs Srihari, Manoj Sriram S
